1. PEER REVIEW PROCESS

All papers accepted for the 13th Hydraulics in Water Engineering Conference, have gone through a thorough peer-review process. Each paper has been reviewed by at least 2 experts in the field of hydraulic engineering and checked by the joint chairs of the Scientific Committee Dr Peter Brady and Dr Stefan Felder. All papers are available in the proceedings of the conference at www.hiwe2017.com.au. They will also be available on the Informit library: <https://www.informit.org/>

Following the call for abstracts, 86 Abstracts were received which were all accepted after a review process by the Scientific Committee. 62 full papers were subsequently submitted. Authors were then requested to revise their manuscript in accordance to the reviewers' comments and editorial recommendation, and to submit for final review before inclusion in the Proceedings. After the peer-review process 47 full papers were accepted into the conference and presented orally at the event. In addition 3 keynote papers were included into the proceedings including the Henderson Oration.
